Network Engineer (m/f/d)

For our client, a renowned pharmaceutical company in Basel, we are looking for a Network Engineer (m/f/d).

Background

You are a hands-on, proactive Network Engineer with experience in campus LAN/WLAN environments. You take end-to-end ownership, from requirement gathering and physical cabling/rack infrastructure up to complex routing/switching protocol design and troubleshooting. You thrive working on-site, in our Basel and Kaiseraugst campuses, collaborating effectively with local and global cross-functional teams, internal clients, and external vendors.

General Information

- Start Date: Asap
- Latest Possible Start Date:3-month notice period considered
- Planned Duration of Employment: 1 year
- Extension (for temporary contracts):very likely
- Workplace:Basel and Kaiseraugst
- Workload: 80 -100%

Tasks & Responsibilities

- Support the network infrastructure at the Basel and Kaiseraugst campuses, including the corporate network, manufacturing areas and computer rooms
- Lead network projects end to end: requirements analysis, solution design based on our engineering standards, planning and handover to Operations
- Manage implementation, including procurement, installation, configuration and commissioning of network

equipment
- Oversee physical network environments and coordinate external contractors and service providers on site
- Manage the lifecycle of the installed infrastructure and provide hands-on local support for incidents

Must Haves

- Technical IT apprenticeship with a focus on telecommunications, or a Bachelor's degree in a related field
- At least 5 years of experience designing, implementing and troubleshooting LAN/WLAN networks in campus and data center environments
- Fluent in German and English
- Strong knowledge of routing and switching protocols (BGP, EVPN, VXLAN, OSPF, STP)
- Experience with physical infrastructure such as MDFs/IDFs, cabling, racks, power and cooling
- Hands-on experience with Cisco and Arista switching, routing and wireless
- Experience working with external vendors and service providers
- Proactive and self-driven, with strong communication and stakeholder management skills

Nice to have

- Certifications such as Cisco CCNA/CCNP/CCIE or Arista ACE
- Network automation and scripting (Ansible, Python)
- Experience with Cisco Catalyst Center, Arista CloudVision, ServiceNow or Splunk
